Title	Main Author	Page No.
The JET Active-Phase Gas Introduction Systems for Neutral Beam Injection and Beamline Commissioning and Operation with Tritium	L Svensson	1
The Relation Between Halo Currents and Plasma Displacement/Deformation in JET	P Andrew	9
Preparations for the Fully Remote Exchange of JET Divertor Modules	A Rolfe	17
Engineering a Remote Survey of JET's Divertor Structure under Conditions of Restricted Access using Digital Photogrammetry	B Macklin	25
Closure of the Bypass Leakage around the JET Divertor with Polymer Seals	H Altmann	33
Plasma Vertical Stabilisation at JET using Adaptive Gain Adjustment	M Lennholm	41
The Development and Testing of a 66kA By-Pass Switch with Arc Commutation Capability for the ITER Coil Power Supply System	T Bonicelli	49
Asymmetric Vertical Displacement Events at JET	V Riccardo	57
An Active Phase Compatible Protection System to prevent Excessive Neutral Beam Shinethrough during JET Plasmas	S Cox	65
Operator Interfaces for JET Remote Handling Equipment	P Carter	73

This document is not published on the web site due to the document size and because poster formats are not suitable for reduction to web page size. Hard copies can be obtained whilst stocks last from the Publications Officer at the address given in the copyright box .
